EXECUTIVE SUMMARY ARIZONA-AMERICAN WATER COMPANY DOCKET NO. W-01303A-05-0280

Arizona-American Water Company, Inc. ("Arizona-American") provides potable water, irrigation water, and wastewater services to approximately 115,000 customers in Arizona.

On April 15, 2005, Arizona-American filed an application for authority to implement Arsenic Cost Recovery Mechanisms ("ACRM") for its Agua Fria, Sun City West, Havasu, and Tubac water districts. On May 4, 2005, Arizona-American filed a motion to delete Tubac Water District from its application.

On May 31, 2005, Arizona-American filed its request for an Arsenic Impact Fee Tariff for the Havasu water district.

Staff recommends the following:

- 1. Authorization of the requested ACRM.
- 2. Arizona-American file a plan with the Commission's Docket Control by December 31, 2005, that describes how the Company will attain and maintain a capital structure (equity, long-term debt and short-term debt) with equity representing between 40 percent and 60 percent of total capital. Staff will address the plan in the Company's Paradise Valley Water Company rate proceeding (Docket No. W-01303A-05-0405).
- 3. The Company should file by April 1st each year subsequent to any year that it has ACRM collections a report with the Utilities Division Director showing its ending capital structure (equity, long-term debt, and short-term debt) by month for the prior year.
- 4. The rate base calculation (Schedule 7) for the Havasu water district be modified to explicitly show a deduction for Arsenic Impact Fee collections.
- 5. The Earnings Test schedule filed in support of the ACRM should incorporate adjustments conforming with Decision No. 67093. For example, the acquisition adjustment should be removed from rate base and the amortization of the adjustment should be removed from the income statement. The actual period results, adjustments, and adjusted period should be clearly shown on each Earnings Test Schedule. The earnings test places a cap on the ACRM surcharge based on the existing authorized rate of return.
- 6. Microsoft Excel or compatible electronic versions of the filings and all work papers be concurrently provided to Staff with all ACRM filings.
- 7. The Company should file the schedules discussed in its application except as modified in the above recommendations. In addition, Staff reserves the right for further discovery as it deems necessary related to the ACRM filings.
- 8. The Company should file an application for a permanent rate increase for its Agua Fria, Sun City West and Havasu water districts no later than April 30, 2008, using 2007 as the test year.
- 9. Approval of Havasu's Arsenic Impact Fee ("AIF") Tariff as modified by Staff and reflected in Staff's attached Tariff Schedule Arsenic Impact Hook-up Fee.
- 10. Havasu be required to file a calendar year status report each January 31st with Docket Control for the prior twelve (12) month period, beginning January 31, 2006, until the AIF Tariff is no longer in effect. This status report should contain a list of all customers that

have paid the AIF Tariff, the amount each has paid, the amount of money spent from the account, the amount of interest earned on the AIF Tariff account, and a list of all facilities that have been installed with the AIF Tariff funds during the 12 month period.

INTRODUCTION

- _

Q. Please state your name, occupation, and business address.

A. My name is Crystal S. Brown. I am a Public Utilities Analyst V employed by the Arizona Corporation Commission ("ACC" or "Commission") in the Utilities Division ("Staff").
 My business address is 1200 West Washington Street, Phoenix, Arizona 85007.

Q. Briefly describe your responsibilities as a Senior Rate Analyst.

A. I am responsible for the examination and verification of financial and statistical information included in utility rate applications. In addition, I develop revenue requirements, prepare written reports, testimonies, and schedules that include Staff recommendations to the Commission. I am also responsible for testifying at formal hearings on these matters.

Q. Please describe your educational background and professional experience.

- A. I received a Bachelor of Science Degree in Business Administration from the University of Arizona and a Bachelor of Science Degree in Accounting from Arizona State University.
 - Since joining the Commission, I have participated in numerous rate cases and other regulatory proceedings involving large electric, gas, telecommunications, and water utilities. I have testified on matters involving regulatory accounting and auditing. During the past nine years, I have attended utility-related seminars on regulation, accounting, finance and income taxes designed to provide continuing and updated education in these areas. Various professional and industry organizations sponsored these seminars.

I have been employed by the Commission as a regulatory auditor and a rate analyst since August 1996. Prior to joining the Commission, I was employed by the Department of Revenue as a Senior Internal Auditor and by the Office of the Auditor General as a Financial Auditor. I was a Cost Center Review Specialist for Blue Cross Blue Shield of Arizona prior to my employment in state government.

I am presenting Staff's recommendations concerning Arizona-American Water

Company's ("Arizona-American" or "Company") requests for (1) arsenic recovery

mechanisms ("ACRM") for its Havasu, Sun City West, and Agua Fria water districts, and

(2) for an Arsenic Impact Fee for its Havasu water district. Staff witness, Marlin Scott,

Jr., is also presenting Staff's engineering analysis and recommendations regarding the

Company's Arsenic Impact Fee request for its Havasu water district in an attached

Q. What is the purpose of your testimony?

A.

BACKGROUND

memorandum.

Q. Please review the background of this application.

A. Arizona-American Water Company, Inc. provides potable water, irrigation water, and wastewater services to approximately 115,000 customers in Arizona.

On November 22 and December 13, 2002, Arizona-American Water Company, Inc. filed applications for fair value determinations of its utility plant and for permanent rate increases for five of its districts. On June 30, 2005, the Commission issued Decision No. 67093 that established fair values and authorized permanent rate increases for the five districts.

On December 17, 2004, Arizona-American filed a motion to request that the Commission re-open the record in Decision No. 67093. The purpose of the motion was to provide an evidentiary basis that would allow the Commission to consider modifying the order so that an Arsenic Cost Recovery Mechanism could be added. Decision No. 67593, dated February 15, 2005, authorized the re-opening of the rate case order "solely for adding an Arsenic Recovery Mechanism."

On March 29, 2005, Arizona-American was directed by procedural order to file a new application requesting an ACRM. The new application was to include all dockets from Decision No. 67093 that would be affected by the ACRM request. On April 15, 2005, Arizona-American filed an application for authority to implement ACRM's for its Agua Fria, Sun City West, Havasu Water, and Tubac Water Districts. Additionally, the Company requested a hook-up fee for its Havasu and Tubac Water Districts. On May 4, 2005, Arizona-American filed a motion to delete Tubac Water District from its application.

On May 31, 2005, Arizona-American filed its request for an Arsenic Impact Fee Tariff for the Havasu water district. On June 8, 2005, Arizona-American filed revised direct testimony for Company witness, Thomas M. Broderick.

CONSUMER SERVICE

- Q. Please provide a brief history of customer complaints received by the Commission regarding Arizona-American's filing.

A.

Staff reviewed the Commission's records for the period April 1, 2005 to June 9, 2005 and found nine opinions have been made against the increase related to the arsenic removal.

SUMMARY OF RECOMMENDATIONS

Q. Please summarize Staff's recommendations.

A. Staff recommends the following:

- 1. Authorization of the requested ACRM.
- 2. Arizona-American file a plan with the Commission's Docket Control by December 31, 2005, that describes how the Company will attain and maintain a capital structure (equity, long-term debt and short-term debt) with equity representing between 40 percent and 60 percent of total capital. Staff will address the plan in the Company's Paradise Valley Water Company rate proceeding (Docket No. W-01303A-05-0405).
- 3. The Company should file by April 1st each year subsequent to any year that it has ACRM collections a report with the Utilities Division Director showing its ending capital structure (equity, long-term debt, and short-term debt) by month for the prior year.
- 4. The rate base calculation (Schedule 7) for the Havasu water district be modified to explicitly show a deduction for Arsenic Impact Fee collections.
- 5. The Earnings Test schedule filed in support of the ACRM should incorporate adjustments conforming with Decision No. 67093. For example, the acquisition adjustment should be removed from rate base and the amortization of the adjustment should be removed from the income statement. The actual period results, adjustments, and adjusted period should be clearly shown on each Earnings Test Schedule. The earnings test places a cap on the ACRM surcharge based on the existing rate of return.
- 6. Microsoft Excel or compatible electronic versions of the filings and all work papers be concurrently provided to Staff with all ACRM filings.

18 19

2021

7. The Company should file the schedules discussed in its application except as modified in the above recommendations. In addition, Staff reserves the right for further discovery as it deems necessary related to the ACRM filings.

- 8. The Company should file an application for a permanent rate increase for its Agua Fria, Sun City West, and Havasu water districts no later than April 30, 2008, using 2007 as the test year.
- 9. Approval of Havasu's Arsenic Impact Fee ("AIF") Tariff as modified by Staff and reflected in Staff's attached Tariff Schedule Arsenic Impact Hook-up Fee.
- 10. Havasu be required to file a calendar year status report each January 31st with Docket Control for the prior twelve (12) month period, beginning January 31, 2006, until the AIF Tariff is no longer in effect. This status report should contain a list of all customers that have paid the AIF Tariff, the amount each has paid, the amount of money spent from the account, the amount of interest earned on the AIF Tariff account, and a list of all facilities that have been installed with the AIF Tariff funds during the 12 month period.

ASENIC COST RECOVERY MECHANISM

- Q. What is the new federal drinking water standard for arsenic and when will it go into effect?
- A. The United States Environmental Protection Agency's ("USEPA") new drinking water standard for arsenic is 10 parts per billion¹ effective January 23, 2006.

¹ The current USEPA drinking water standard is 50 ppb.

16

17

18

19

20

2122

23

24

Q. What are the estimated capital costs of complying with the new EPA arsenic standard?

A. Arizona-American estimates that it will cost over \$42 million to construct new facilities to comply with the new USEPA arsenic standard. The costs for the Agua Fria, Havasu, Tubac, and Sun City West water districts will be approximately \$25 million. Additionally, significant operating expenses related to arsenic remediation are projected by the Company.

Q. What is the purpose of the Company's ACRM request?

A. The purpose of the Arizona-American requested ACRM is to establish a methodology to calculate the additional costs related to arsenic treatment and disposal and to establish a mechanism for recovery from customers.

Q. Can Staff please describe Arizona-American's proposed ACRM?

A. Yes. The Company states that the mechanism is essentially the same as that approved in the Arizona Water Company, Inc. Northern Division's ("Arizona Water") proceeding (Decision No. 66400, dated October 14, 2003).

According to Company witness, Thomas M. Broderick², the ACRM is as follows:

- 1. The ACRM is to be based on actual costs. The costs eligible for recovery are depreciation expense, gross return, and recoverable operations and maintenance expense ("O&M").
- 2. Rate recovery for the ACRM begins after new facilities are in service and are in compliance with the new USEPA arsenic standard.

² Direct testimony of Thomas M. Broderick, at page 5, lines 1 though 19.

17

18

19

- 3. Deadlines for filing the next rate cases for the three water districts will be per existing Commission orders³ with the exception that Arizona-American may file earlier if it chooses to do so. Arizona-American proposes to file an application for a permanent rate increase case for the Agua Fria and Sun City West water districts no later than April 30, 2008, using 2007 as the test year, and for Havasu no later than April 30, 2009, using 2008 as the test year.
- 4. The ACRM rate design will generate 50 percent of the costs from the monthly customer charge and 50 percent from the commodity.
- 5. Ten schedules as required in Decision No. 66400 will be filed with each ACRM request.
- 6. Recoverable operations and maintenance costs include only media replacement or regeneration, media replacement or regeneration service, and waste disposal.
- 7. A deferral for future recovery of up to 12 months of recoverable O&M without return commencing with the in-service of facility(s) within each district.
- 8. Two step-rate increases in each district with an ACRM.
- 9. No true-up of the ACRM for over or under collection.
- 10. Gross return included in the ACRM based upon earlier rate of return and return on equity findings which for Arizona-American was 9 percent authorized in Decision No. 67093, dated June 30, 2004.

³ Decision No. 66400, page 10 at line 9, "... file a general rate application... no later than September 30, 2007, based on a 2006 test year." Staff interprets Arizona-American's statement as applying only to the Decision. The rate case moratorium imposed in Decision No. 65453 should remain unaffected.

24

25

Q. Are the schedules and information that Arizona-American proposes to be filed for its ACRM the same as those required in Decision No. 66400 for the Arizona Water ACRM?

- A. Staff reviewed the schedules required per Decision No. 66400⁴ and found that they are the same as those proposed by Arizona-American. The schedules and information that Arizona-American proposes to file are as follows:
 - Balance Sheet The most recent balance sheet for the total Company at the time of filing the ACRM request.
 - Income Statement The most recent income statement for the total Company and for the Agua Fria, Havasu, and Sun City West water districts.
 - Earnings Test An earnings test calculation for the Agua Fria, Havasu, and Sun City West water districts.
 - 4. <u>Rate Review Filing</u> A rate review calculation for the Agua Fria, Havasu, and Sun City West water districts.
 - 5. <u>Arsenic Compliance Revenue Requirement</u> An arsenic compliance revenue requirement calculation for the Agua Fria, Havasu, and Sun City West water districts that is based upon arsenic plant and recoverable arsenic operating expenses.
 - 6. Surcharge Calculation A detailed calculation of the surcharge.
 - 7. Rate Base Schedule A schedule showing the elements and the calculation of the rate base.
 - 8. <u>CWIP Ledger</u> A ledger showing the transactions recorded in the construction work in progress account.

⁴ At page 14, beginning at line 9.

Q. Did Staff compare Arizona-American's proposed arsenic mechanism to that 1 2 authorized by the Commission for Arizona Water? 3 A. Yes. 4 5 What dates does Arizona-American's propose for filing permanent rate applications Q. for the Agua Fria, Sun City and Havasu water districts? 6 7 Arizona-American proposes to file permanent rate applications for the Agua Fria and Sun A. City West water districts no later than April 30, 2008, using 2007 as the test year, and no 8 9 later than April 30, 2009, using 2008 as the test year for the Havasu water district. 10 11 Q. Is Staff recommending a modification of Arizona-American's proposed permanent 12 rate increase filing date for the Havasu water district? 13 A. Yes, Staff recommends that Arizona-American file its Havasu rate application at the same 14 date as the other two districts. Arizona-American did not provide any explanation for delaying the Havasu filing for an additional year, and it would be more efficient, if less 15 16 convenient, to process the applications simultaneously. 17 What ACRM filing requirements is Staff recommending? 18 Q. 19 A. Staff recommends that the Company's ACRM filings include hard copies of the ten schedules. In addition to the hard copy filings, Staff recommends that Microsoft Excel or 20 compatible electronic versions of the filings and all work papers be concurrently provided 21 22 to Staff. Further, Staff reserves the right for further discovery as it deems necessary 23 related to the ACRM filings.

ASENIC IMPACT FEE (HOOK-UP FEE)

Q. What is the Arsenic Impact Fee?

A. According to the Company's application, the arsenic impact fee ("AIF") is a hook-up fee, which is applicable only for the Havasu water district, to be paid by new customers that would offset capital costs associated with arsenic treatment and disposal and lower the overall amount of the surcharge needed.

Q. What concern does Staff have about the Company proposed Arsenic Impact Fee?

A. Staff is concerned that hook-up fees may worsen the Company's capital structure and cash flow in the long run. The AIF is a zero cost source of capital. Although the AIF has zero cost, it has the affect of diluting the percentage of total capital represented by equity. In future rate cases, the AIF would represent contributions in aid of construction ("CIAC"). The Company would not earn a return on the CIAC or recover depreciation on the plant acquired by the AIF resulting in reduced cash flows.

Q. Why is the Company's capital structure a concern?

A. Financial risk increases as debt becomes a greater proportion and equity becomes a smaller proportion of total capital.

Q. In general, what is an appropriate range for equity as a percent of total capital?

A. An appropriate range for equity in the capital structure is between 40 and 60 percent.

Q. What is the capital structure of typical water companies?

A. Attached is Exhibit 1, which is Schedule AXR-2 of the surrebuttal testimony of Staff witness, Mr. Alejandro Ramirez, for the pending Chaparral City Water Company rate proceeding (Docket No. W-02113A-04-0616). Exhibit 1 shows that equity ranged from

44.6 percent to 56.9 percent of total capital for a sample of six water companies followed by Value Line. The capital structures of these water companies demonstrate the industry norm, and all of the sample companies have capital structures with equity representing between 40 percent and 60 percent of total capital.

5

6

7

8

1

2

3

4

- Do NARUC sponsored training classes recognize that a 40 percent proportion of Q. equity in the capital structure is reasonable?
- Yes. A.

9

10

11

12

- What percentage of total capital was represented by equity in the capital structure Q. adopted in Decision No. 67093?
- Equity represented 39.9 percent of total capital. A.

13

14

Q. What is Arizona-American's updated capital structure?

15

A.

\$198,772,252 in long-term debt and \$115,410,355 in equity⁵, for total capital of

17

16

\$314,206,410. This results in a capital structure consisting of 63.3 percent debt and 36.7

As of December 31, 2004, Arizona-American reported \$23,803 in short-term debt,

18

percent equity.

19

What is Arizona-American's capital structure when CIAC is considered? Q.

21 22

20

As of December 31, 2004, Arizona-American reported CIAC of \$20,762,038.6 Including A. CIAC in the capital structure reduces the equity component to 34.45 percent

[\$115,410,355/(\$314,206,410 + \$20,762,038)].

24

⁵ Source: Balance sheet (page 6) of the Company's 2004 Utilities Annual Report ⁶ Source: Balance sheet (page 6) of the Company's 2004 Utilities Annual Report

- Q. What has happened to the percentage of equity in Arizona-American's capital structure since its prior rate proceeding?
- A. Equity as a percentage of total capital has declined from a marginal 39.9 percent to 36.7 percent as of December 31, 2004.
- Q. In general, what affect would reducing the proportion of equity in the capital structure have on the weighted average cost of capital?
- A. Since equity is generally more expensive than debt, reducing equity decreases the weighted average cost of capital. Thus, if the weighted average cost of capital (i.e., the rate of return) authorized in the rate proceeding is used for the ACRM earnings test, the test will not recognize the Company's current lower capital cost. While Staff recognizes that lowering costs to increase efficiency and profitability is a legitimate objective for the Company, it should not be accomplished by inappropriate means such as an excessively leveraged capital structure.
- Q. What are Staff's conclusions and recommendations regarding the Havasu AIF and the ACRM?
- A. Staff supports authorization of an AIF for Havasu as presented in Table 1^7 .

 $^{^{\}rm 7}$ As shown on the attached "Arsenic Impact Hook-Up Fee" tariff schedule.

Page 13

1

Table 1

ARSENIC IMPACT FEE TABLE

1"	2.5	\$2,175		
1-1/2"	5	\$4,350		
2"	8	\$6,960		
3"	16	\$13,920		
4"	25	\$21,750		
6"	50	\$43,500		
8" or larger	80	\$69,600		

Staff further concludes that in order for the Company to qualify for a special

accommodation such as an ACRM, it should be required to obtain an appropriate capital

structure. Accordingly, Staff recommends that Arizona-American file a plan with the

Commission's Docket Control by December 31, 2005, that describes how the Company

will attain and maintain a capital structure (equity, long-term debt, and short-term debt)

with equity representing between 40 percent and 60 percent of total capital. Staff will

address the plan in the Company's Paradise Valley Water Company rate proceeding

Further, the Company should file an application for a permanent rate increase for its Agua

Fria, Sun City West and Havasu water districts no later than April 30, 2008, using 2007 as

17

18

HAVASU SCHEDULE 7, RATE BASE

the test year.

(Docket No. W-01303A-05-0405).

- Q. What information does the Company propose to be presented on Schedule 7?
- A. The Company proposes to present the rate base calculation for the ACRM.

1

2

3

Q. Does the rate base calculation presented on Schedule 7 have a line item deduction that segregates the Arsenic Impact Fees from other CIAC?

4

A. No, it does not.

5

6

Q. What does Staff recommend?

7

A. Staff recommends that Schedule 7 be modified to show a separate line item deduction for Arsenic Impact Fees.

9

10

8

EARNINGS TEST - CONFORMING ADJUSTMENTS

11

Q. What does Staff recommend concerning the Earnings Test schedules to be filed in support of the ACRM and Arsenic Impact Fee?

1213

14

15

16

A. Staff recommends that the Earnings Test schedules filed in support of the ACRM incorporate adjustments conforming with Decision No. 67093. For example, the acquisition adjustment should be removed from rate base and the amortization of the adjustment should be removed from the income statement. The earnings test places a cap on the ACRM surcharge based on the existing authorized rate of return.

17 18

19

20

Q. Does this conclude your direct testimony?

1,

A. Yes, it does.
